

Direct access to patient data, X-rays, e-mail and much more:

The KALEO is a powerful webpad that supports attending physicians and nursing staff in many communication, data transmission and information tasks and thus eases the daily work.

Optimize your service, quality and efficiency.

KALEO medical applications

Ward Round

The teXXmo perfectly supports ward rounds in hospitals: Attending physicians and nursing staff have direct access to patient records, prescriptions, as well as occupancy and assignment schedules. Documentation and information flow are performed directly with the hospital information system, without any media breaks. At any time, authorized personnel can access necessary data – always handy, always readable!

Digital Patient Record

TeXXmo's with its flexible interfaces and its variety of accessories is ready for the digital patient record: smart card reader for the health care ID card, fingerprint scanner for authorizing hospital personnel, as well as barcode and RFID scanners for patient identification. - the future patient record.

Emergency Response

The ruggedized wireless display, together with emergency medical software, combines vital functionality needed at the point-of-emergency. First responders can wirelessly receive assignments with address data, use the integrated GPS-based navigation system to find the right location, show and analyze vital signs transmitted by medical equipment, document performed steps with a fingertip and send the patient records directly to control centers and hospitals.

Inventur

The facilitates inventory procedures: equipped with barcode or RFID scanner the KALEO helps in counting processes and documentation of pharmaceutical products and hospital equipment. Already during distribution of drugs to the patients, the permanent inventory is running, contraindications and incompatibilities are displayed immediately for every patient. Unused beds are localized and instantly returned to circulation.

The computer that improves your service: small, lightweight, flexible. With the KALEO, hospital personnel have direct access to patient records and can review up-to-date vital signs.

← Service
